

# EXTRUCOAT Company Profile

Extruding Aluminum and  
electrostatic painting

## 1 Who we are...

the founders of the company has the experience s in the Aluminum Industry from more that 32 years They started from the fabrication to the painting of aluminum and metal treatment with the latest technologies in the field of electrostatic vertical lines and wood effect.

They did not stop here the founders followed the path of success with Extrucoat company, Extrucoat it is specialized in the extrusion of Aluminum profiles and with the addition of a vertical line paint the chain is now completed to achieve a finished product with a European quality standards.

Our services are not limited to the Egyptian market we have our share of exporting painted Aluminum profiles to several countries in the middle east and Africa, our quality is the main factor in expanding our market share.

Since our main focus is quality control, we Deal with the finest European companies in the field of quality control in order to do periodic inspections on our products. We will continue to enhance our quality to maintain the superior level of customers' satisfaction- inside and outside of Egypt- in our production, implementing to our principal "more than customer's satisfaction".

## 2 Our Vision...

**Our vision is to offer Egyptian products that compete the European products for all our target markets nationally and globally.**

## 3 Our mission statement...

**Our mission is to produce the best Aluminum products by consistently maintaining the highest quality and adjusting to our customers' needs to become the pioneers of our industry nationally and globally.**

## 4 Products

The company sells all commercial and private architectural systems produced by our sister company or our authorized companies. Commercial systems are those that do not have intellectual property rights or are registered and are extruded in any extrusion company (jumbo, tango, m900, m9200, m940)

The private architectural systems are registered in the name of any company and have intellectual rights.

All these private and commercial systems are produced by the grantee of the company, where we adhere to the thickness, weight and dimensions of the sections according to their original design in the commercial catalog of each system.

1. **Volcano 120** - Large sliding system 120 mm ( **Vol 120, Vol 120 ANOX** ).

2. **Volcano 70** - small sliding system 70 mm ( **Vol 70, Vol 70 ANOX** ) .

3. **Volcano 44** - 44 mm hinged system.

4. **Volcano Slim Anox** – sliding panorama view

4. **Volcano 55** - Heavy duty 2mm hinged system.

5. **Volcano Thermal Break Hinged System ( TV 400 )** .

6. **Volcano Thermal Break sliding system ( TV 200, TV 200 ANOX )** .

6. **Volcano MH** façade system for the economic solutions.

9. **Volcano Handrail** – handrail systems

8. We are agents and authorized manufacture for:

**SMART façade systems** (Authorized solitary agent).

- Volcano system is a firm, durable, and enduring profile which is characterized by its various shapes, sizes and competitive prices.

- THERMAL BREAK is unique for its total isolation from heat, sound and dust; it is totally impermeable. Moreover; Thermal break reduces energy consumption by 30%. Additionally, THERMAL BREAK provides you with the opportunity of having a window with external color different from its internal color.

## 5 Our Services...

### Extrusion:

**Our extrusion plant has the latest technologies for producing aluminum profiles with the European standards in the field, we extrude 7000 tony annually extendible to be 25,000 tons with complete project completion**

### Painting:

**With a 100 tons daily painting capacity we have the biggest market share in Egypt, we offer the painting service and painted aluminum stock from all the windows and kitchens systems.**
